

## Installation Checklist

Please print and sign this checklist when sending payment for your order along with signature of acceptance notice below. Installation of the above system at the aforementioned price is based on several conditions, these include:-

- Payment in Full in advance of installation (minimum 3-days)
- Both components of the system must physically fit in the designated area and pipe run be possible
- Payment for any extras or variations due same day upon completion
- Pipe run no longer than 6m
- Planning Permission should be in place prior to installation if applicable
- Installation undertaken during normal working week, within normal working hours (some evening and weekend work would be suitable for Global Cooling Ltd. so please check with us on [info@air-conditioning-shop.co.uk](mailto:info@air-conditioning-shop.co.uk) for possible variations to this ruling)
- Installation being within 1 day (10 hour day applicable, no refunds or discounts are available for projects that take a shorter duration).
- Only one core hole to outside (Our engineers shall drill the exit hole through the external wall as long as it is made from normal material, i.e. no steel, reinforced concrete, RSJ beams etc.; also price is based on one exit hole being drilled with a time scale of 1-2 hours allowed for this drilling, subsequent delays due to wall material shall be charged at standard hourly rate)
- No condensate pump required (one may be required should pipe work go up into a false ceiling or loft to be routed to the external unit/wall, applicable charge of £125-00 + VAT if required).
- No PVC Trunking required to conceal pipe-work (the pipe work shall be secured by positioning clips and run neatly, trunking is available as an extra and must be specified before installation and shall be chargeable on top of above installation rate)
- External Unit is no higher than 3m from safe working ground level (i.e. flat, solid ground that a ladder or mini-tower can be erected safely)
- No crane's or large scale lifting apparatus being required
- This excludes mains electrical connection (on the 9000btu and 12000btu models should a suitable 3-pin socket be within 1m from internal unit then we would offer connection of mains, including waterproof external isolator, for £ 75-00 + Vat at the prevailing rate)
- Distance is nationwide mainland U.K† (other areas shall be considered, please email [info@air-conditioning-shop.co.uk](mailto:info@air-conditioning-shop.co.uk), † for confirmation if your post code is covered by the offer)
- No Congestion Zone or Parking Charges (offer is based on these charges not being applicable, should your installation fall into either category then subsequent parking and congestion zone charging shall be applicable)
